DETAILED ACTION

Claim Rejections - 35 USC § 102

1. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless -

- (b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.
- 2. Claims 1-2, 7-8, 11-12, 15-17, 20-24, 29-30, 33-34, 37-39, 42-45, 50-51, 54-55, 58-60 and 63-64 are rejected under 35 U.S.C. 102(b) as being anticipated by Baldwin.

Baldwin (US Patent Number 4,994,987) discloses a projection display apparatus (38) that carries out processing with information stored in a portable memory (column 4, lines 14-16), comprising a memory controller (column 3, lines 43-47) configured to read out the information stored in the portable memory (34), the information including at least one image data (column 2, lines 54-58) representing a presentation sheet prepared in advance. The image processing section (32) is configured to prepare the display image data (e.g. embellishment image data; column 3, lines 30-31) by using the image data stored in the portable memory (34) according to an instruction of a processing program which is read from the portable memory (34) and which represents a series of processing steps to be executed (Figure 4) by the projection display apparatus. An electro-optic device (38) configured to form image light in response to the display image data (column 4, lines 20-23). A method for reading out and preparing the information stored in the portable memory (column 3, lines 8-12). A projection display apparatus

Application/Control Number: 09/714,189

Art Unit: 2851

(38) comprising means for reading from a portable memory (34) the information to be displayed, preparing an image data from information read by said means for reading (column 6, lines 27-28), forming an image light in response to said image data (column 6, lines 33-39), and projecting said image light on a projections screen (column 4, lines 20-23).

Claim Rejections - 35 USC § 103

- 3. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:
 - (a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negatived by the manner in which the invention was made.
- 4. Claims 3-6, 9-10, 13-14, 18-19, 25-28, 31-32, 35-36, 40-41, 46-49, 52-53, 56-57, 61-62 are rejected under 35 U.S.C. 103(a) as being unpatentable over Baldwin.

Baldwin (US Patent Number 4,994,987) teaches the salient features of the present invention.

Baldwin discloses a computer (32) that inherently comprise means for controlling an electric power supply circuit; means to reproduce sound based on the information stored in the portable memory; and a method to edit and write a processing program into the portable memory.

Furthermore, it is well known in the art that a computer are commonly known to have means for controlling an electric power supply circuit, means to reproduce sound (e.g. sound card) based on the information stored a portable memory (e.g. diskette,

Application/Control Number: 09/714,189

Art Unit: 2851

memory card), and a method to edit and write a processing program into the portable memory (i.e. means for saving, retrieving and changing the information saved on a diskette).

Response to Arguments

5. Applicant's arguments with respect to claims 1-23 have been considered but are most in view of the new ground(s) of rejection.

Conclusion

6. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure.

Ronzani et al. (US Patent Number 5,630,659) discloses a compact high resolution light valve projector including inputs for user controls audio, video and power, as well as outputs for speakers, display drive signals and power to the lamp and lens system. A video scan converter can be included with the housing and can include a PCMCIA or other memory card.

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Magda Cruz whose telephone number is (703)308-6367. The examiner can normally be reached on Monday through Thursday 8:00-5:30 PM.

Art Unit: 2851

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Russ Adams can be reached on (703)308-2847. The fax phone numbers for the organization where this application or proceeding is assigned are (703)746-4355
